

CIILOCK DESIGN: We understand that every project is unique. Often it is easy to identify a problem, but with the global technology landscape constantly shifting and changing it can be difficult to decide on the perfect solution, or how best to execute your idea, that's where we come in. Our knowledge in design, prototyping and manufacturing can help you create the perfect product to set you apart from your competitors.

KYOTO HANDLE: Inspired by Japanese Zen style. KYOTO creates a sleek new way to open sliding doors. With minimalist styling partnered with a full steel lock module, KYOTO is designed to last.

VOLTA POWERED ROLLER One of the world's first powered rollers, assisting the future of sliding doors. The VOLTA operates like a normal sliding door but feels different.

TITAN BI-FOLD: Encompassing a collection of hardware carefully designed to ensure installation and function is as simple as possible, with attention to detail and innovative features at every turn, the Titan is truly the 'Be-All and End-All' of Bi-Fold Systems in every aspect.
